Comments fth -3
- descriptive comments for extreme cases
- identifies purpose of each method
- identifies outcome of print statements in main meth
- no comments in interface

Style - 4
- follows Java conventions (underscore before
  instance variables)

- effective whitespace
- has closing brackets on their own lines

Robustness - 3
- doesn't compile (63 errors) because of incorrect
  brace
- but the rest of code is concise and broken
  ur for clarity

README.md -4
- has clear workflow plan
- robust explanation for architecture choice and
  method selections
- clearly identifies instance variables
